

Assignment Submission Structure

Objective: Read and carefully analyze the research paper & Submit a PPT with video recording below.

Below is expected scope for content in the slide(s):

- The main objective and motivation of the paper
- The key techniques and algorithmic approaches introduced
- The experimental setup and environments used (e.g., Atari games)
- The main results and their significance in reinforcement learning research
- Any limitations or open questions highlighted by the authors
- Your critical reflection on the impact and potential future work
- Additional points(if any)

Submission Instructions:

- Students **contribute equally** in a group for assignment and as mentioned below: Kindly **attempt the concerned assignment as allocated for groups, attempting and submitting the unassigned assignment for different groups will be marked as zero.**
- **Max 2 submissions are allowed**, latest submission would be considered for the evaluation.
- Add file name as DRL_AssignmentName_GroupNo and **file size should not exceed 10MB. Submit both PPT and** Video, Video length should not exceed more than 2 minutes
- Kindly submit the assignment before the last submission date, to avoid any hassle or platform busyness. **No assignment submission extensions will be given at any circumstances!**
- Mention the **Group Name, Correct name and BITS id of all contributors in the PPT's First Page**, **missing names will not be marked so double check before final submission.**
- Submission via Email, MS Teams will not be accepted and will not be marked.

Assignment Distribution Among the Groups:

- **Assignment Problem - I :** <https://arxiv.org/pdf/2510.27001> (A Framework for Fair Evaluation of Variance-Aware Bandit Algorithms)
Group: from 1 to 40
- **Assignment Problem- II:** <https://arxiv.org/abs/1312.5602> (Playing Atari with Deep Reinforcement Learning)

Group: from 41 to 80

- **Assignment Problem - III:** <https://arxiv.org/pdf/1912.11023> (Learning an Interpretable Traffic Signal Control Policy)

Group: from 81 to 120

- **Assignment Problem - IV:** <https://arxiv.org/pdf/1904.10040> (A Survey on Practical Applications of Multi-Armed and Contextual Bandits)

Group: from 121 to 160

- **Assignment Problem - V:** <https://arxiv.org/pdf/1707.06347> (Proximal Policy Optimization Algorithms)

Group: from 161 to 199

Communication:

- Any request for clarification must be addressed through email (official email only) with proper explanation
- Messaging in TEAMS is discouraged. This is to ensure we maintain track of all the transactions.
